#### MATERIALS AND RESOURCES

<b>bp meets criteria</b>	EPP
Garage Doors	MR 4.1, 4.2, 5.1, 5.2

### National Green Building Standard

#### RESOURCE EFFICIENCY

<b>bp meets criteria</b>	Recycled Material
Garage Doors	604.1

### Green Globes

#### RESOURCE EFFICIENCY

<b>bp meets criteria</b>	Recycled Content
Garage Doors	E.2

**bp** Glass Garage Doors may help a project achieve third-party certifications, such as LEED or Green Globes by providing an Environmentally Preferable Product (EPP).

**bp** Glass Garage Doors has historically streamlined its operational necessities to minimize any waste of materials, maximizing the ability to recycle and reuse post-industrial materials.

**bp** Glass Garage Door & Entry Systems manufacturing plant utilizes approximately 25-40%, by weight, of post-industrial (pre-consumer) and 60-75%, by weight, of post-consumer recycled materials within our products and manufacturing process. In addition, approximately 95% of the raw materials utilized in production are manufactured regionally within 500 miles of our manufacturing facility.

**bp** Glass Garage Doors has a commitment to utilize recycled materials while meeting the needs of our valued customers and sustaining the environment we all live in.
